James Brent Wins 1984 Argut Rossi Scholarship

The Argut Rossi Scholarship for 1984 was presented to James Brent, son of **Pam Brent,** Executive Secretary/FOCUS Editor, on June 6, 1984, at a luncheon held in his honor.

The $2,500 scholarship is awarded each year to the son or daughter of an Allergan employee who has made outstanding achievements in academic studies and extracurricular activities.

James graduated from Saddleback High School in Santa Ana June 13. Some of his school activities include acting in theatrical productions, being a member of the speech and debate teams, Student Congress, marching band, California Scholarship Federation and the Science Club.

When looking at the list of honors James has received, you can understand why he was selected as the Argut Rossi Scholarship winner. He is included in *Who's Who of American High School Students,* is a National Merit Scholarship winner for outstanding SAT scores, was Saddleback High School's Boy of the Month in February, 1984, and is nominated for the school's Boy of the Year Award, has won several speech and essay contests, was voted most popular, best actor, most creative, best sense of humor and the list goes on and on.

James plans to use his scholarship at SMU in Dallas where he will study communications or psychology.

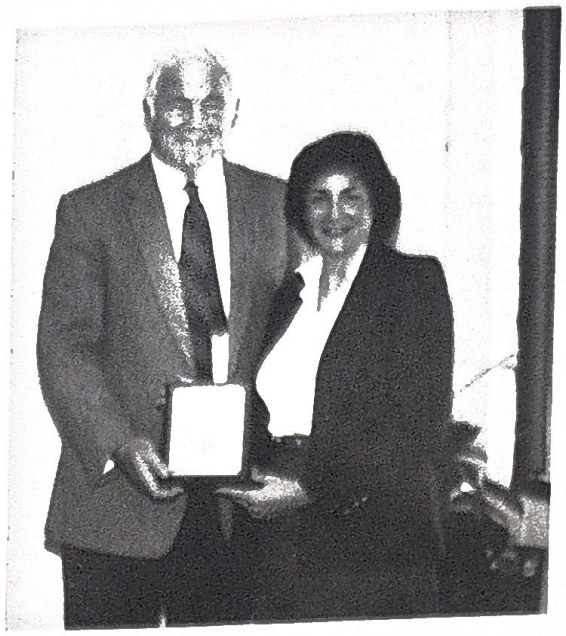
A panel of three judges selected James as the Scholarship winner after interviewing four other candidates. The panel members include:

- Jerry Lyons, Director of Industrial Relations Townsend Textron, Cherry Fasteners Division
- Dr. Mary Pratt, Ophthalmologist
- Professor Stuart Krassner, Developmental and Cell Biology, UCI

The Scholarship program is coordinated by **Jeanne Herman** in Human Resources.

Apology

Our apologies go out to **Valerie Albanesius** who works in Human Resources. She was part of the successful March of Dimes teamwalk, and we forgot to mention her name in last month's FOCUS. Good work, Valerie.



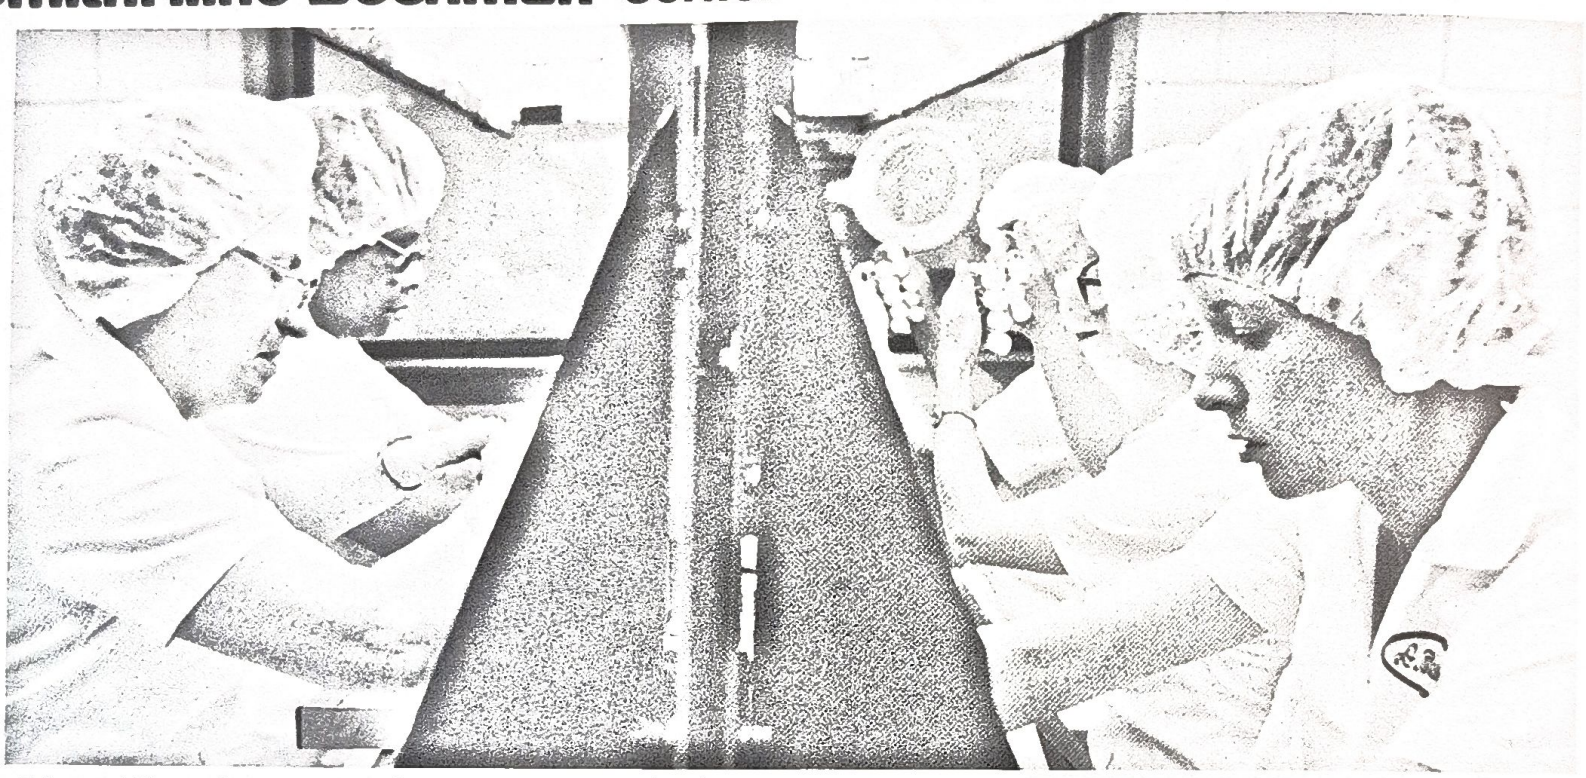
Appreciation award

Dave Saylor and **Jackie Weiss**, Trade and Professional Relations were awarded a plaque by the Orange County Pharmacist Society for appreciation for services.

The Society holds their meetings in the Ground Floor Conference Room the 4th Thursday of every month from 8:00 pm - 10:00 pm. All Allergan employees are invited to attend.

If you are interested in attending or need additional information, contact Jackie Weiss, extension 4491.

SmithKline Beckman Corner



'Monocid' production is under way at the Smith Kline & French Laboratories anti-infective manufacturing facility in Upper Merion, PA. On May 23, SK[F received approval from the U.S. Food and Drug Administration (FDA) for the marketing of 'Monocid', the first once-a-day cephalosporin available in the United States.

'Monocid': The Right Product at the Right Time

'' 'Monocid' more and more looks like the right product at the right time because of its unique potential to cut hospital and patient costs,'' said Henry Wendt, SmithKline Beckman President and C.E.O., at the 96th Annual Meeting of Shareholders held last month.

On May 23, 1984, Smith Kline & French Laboratories received final approval from the U.S. Food and Drug Administration for the marketing of 'Monocid', the first once-a-day injectable cephalosporin antibiotic in the United States.

Despite its success in the laboratory, 'Monocid' at first was met with some skepticism by clinicians. ''Nobody would believe that an antibiotic administered once a day for infections would work,'' says Dr. Len Jacob, Vice President, Clinical R&D-North America, and 'Monocid' Project Director. ''What a fantastic feeling it was to have them call on the phone and say, 'You know this drug is working once a day, I want to continue to study it.' ''

The challenge facing the marketing team, according to Jim Johnson, Group Product Director, Anti-Infectives, SK&F Labs-U.S., is to get 'Monocid' established as the standard in the marketplace. ''Clinically, the drug has worked beautifully but we are aware that we have to get that message to physicians. There is some skepticism because they are used to using antibiotics three, four, five times a day, and now we have a product that's used once a day.

Allergan guest

We had an honored guest among us May 14, 1984. Former President Richard Nixon who was in California to give a speech at Chapman College and also to see how the Nixon Library is progressing, stopped by Allergan for a visit. Mr. Nixon is pictured here with Mr. Herbert and his daughter, Cindy.

New safety programs for Operations

A new spirit of safety awareness is developing at Allergan — especially in Operations. Safety committees are meeting monthly and conducting ''Safety walk-throughs'' to identify potentially unsafe conditions. Beginning July 1, a new Safety Incentive Awards Program will provide Operations' employees opportunities to win prizes if their work group avoids lost-time accidents. Beginning July 30, Operations' managers and supervisors will begin training to observe and convert potentially unsafe behavior.

Providing a safe work environment has always been an important Company objective. Safety walk-throughs conducted by trained safety committees will help managers and supervisors to identify potentially unsafe conditions which may not have been noticed. Working together, safety committees and supervisors can correct unsafe conditions and assure Allergan employees our work environment is a safe one.

Working safely is an important responsibility of all Allergan employees. Sometimes work habits can develop which are unsafe. Operations' managers and supervisors are going to become experts at identifying and correcting unsafe behavior. **Ken Morrow** will train the Operations' management team using the DuPont Supervisor Training and Observation Program (STOP). By observing work practices, supervisors will help Operations' employees to work more safely. They will also exemplify good work practices and ''catch somebody doing something right''.

The Safety Incentive Awards Program is Allergan's way of congratulating those Operations' work groups who work safely. The quality of awards will increase in value from month-to-month for those groups without lost-time accidents.

So, if your supervisor suggests another, safer way to do your job, take the advice to heart. You could win some nice prizes and stay injury free. Keep in mind — the accident you save may be your own.

New disabled worker policy

The thought of becoming physically disabled conjures up frightening thoughts for most of us — such as being unable to perform our present job duties, loss of income and restricted activities. Allergan recognizes these concerns and has developed a procedure to assist employees who have received work-related disabilities.

The disabled worker policy gives priority for reemployment to injured workers who are ready to return to work. Human Resources will attempt to place these employees in positions which are comparable in skill level and salary to the positions they had before their injury. If a full time position is unavailable when an employee is ready to return to work, Human Resources will make every attempt to place the employee in a temporary assignment until a full time position is available.

This policy is designed to accomplish a speedy and smooth transition back into the work force for employees who have received work-related injuries. Questions regarding this policy should be directed to **Lorna Larson** on extension 4299.

te • leph • o • ny — Call Hold

Overview

Call Hold provides a way to place a call on hold without a red hold button. Use **Call Hold** in these situations:

1. You wish to look up information in your records.
2. You wish to consult privately with a third party.
3. You wish to alternate between two parties on hold.
4. You have a call on your line and you wish to activate another **Dimension PBX** feature without disconnecting the call.

To Use Call Hold

Assume a call is already on your line.

1. Depress the Switchhook
   Listen for Recall Dial Tone
2. Dial the Call Hold Code: *4

You will hear dial tone for a short time, followed by silence. If you wish to activate another feature or to dial party, dial the number as soon as you hear dial tone. If you wish to look up records, just lay the handset down. Do **not** hang it up.

To Return to Your Held Call

1. Hang up.
2. Wait for your phone to ring.
3. Answer and resume conversation.

To Use Call Hold to Alternate Between Two Calls

First, to place Party A on hold and dial Party B:

1. Depress the Switchhook
   Listen for Recall Dial Tone
2. Dial the Call Hold code: *4
   Listen for Dial Tone
3. Dial Party B
   Party A is held

Now, if you wish to hold Party B and return to Party A:

1. Depress the Switchhook
   Listen for Recall Dial Tone
2. Dial the Call Hold code: *4
   Party B is held and Party A will be back on the line
3. Start conversation

You may continue to alternate between the two parties in this manner. If you wish to terminate with either party at any time and resume conversation with the remaining party:

1. Hang Up.
2. Your phone will ring.
3. Answer and resume conversation.

Notes on Call Hold:

- When you use Call Hold to alternate between two parties, you may alternate as many times as you like.
- You may only have one party on hold at a time.
- You cannot hang up to Transfer a call or depress the Switchhook to form a Threeway Conversation after you have used Call Hold. You must return to your held call first and then follow the procedures for Transfer or Threeway Conversation.

Vacation requests

Vacations are provided so that employees can take much needed time away from work pressures for relaxation, travel, to spend time with families and to pursue outside interests.

After six months of service, you accrue vacation time each pay period, retroactive to your date of hire, which may be taken as it accrues. Vacation time may be taken in increments of one full work day or more. The company prefers, however, that you take your vacation in increments of 40 hours or more so that you can receive the full benefit from the time off. Your 16 hours of paid personal business leave per year may be used in increments of two hours or more.

One month prior to the beginning of your vacation, a ''Change of Status'' form should be sent to Human Resources so that the personnel technicians can verify eligibility for the time requested. If a payday falls during your vacation, and you would like to receive your check before you leave, please mark the ''Change of Status'' form accordingly.

To keep abreast of your available vacation time, please refer to the monthly recap that your department manager receives. Further questions should be directed to **Bonnie Gosney** for nonexempt employees or **Barbara Poole** for exempt employees.

Panic Button

Is there anything more likely to cause you an anxiety attack than your resume getting stuck in the office copying machine?

Golf tournament

Our annual golf tournament will be held August 18 at the Green River Golf Course. Look on the bulletin boards for specific information on entry fees, times, etc.

Questions that puzzle — You can find an answer through the Community Access Library Line.
(800) 372-6641

Child Care Concerns

Recently many working parents and others without small children throughout Allergan have expressed their concerns about difficulties in locating reliable, good quality child care for their children during work hours. A child care study completed by the city of Irvine in March of this year has confirmed that indeed child care is a serious problem which will become even worse as our communities grow.

The study revealed that in the city of Irvine alone, if there is no increase in the number of child care spaces by 1988, we can expect there to be 1,300 under two, 1,200 preschoolers and 5,600 school age children under 10 with both parents working, for whom there are no spaces available in the child care system.

In response to this and many similar gloomy forecasts regarding the availability of quality child care, a small committee of Allergan employees has formed to pool talents and share ideas in studying the child care problem. The committee would like to form some viable solutions or alternatives to help alleviate the ''child care blues'' for Allergan parents.

Before offering any proposals, the committee would like to hear from all of you who are also concerned with the issue of child care. We've arranged an open forum meeting on Tuesday, July 17, in the Ground Floor Conference Room. Please stop by and let us hear your comments, complaints, bright ideas, good referrals and ''war stories'' regarding child care.

To assist the committee in tailoring our child care alternatives to specifically suit the needs of Allergan employees, we ask that you complete the Child Care Concerns questionnaire on the reverse side of this page and send it to Jill Buda in Human Resources by July 31. Whether you're a parent, a future parent or a concerned childless person, your input is extremely valuable to the child care committee's effort.

If you would like to volunteer some of your time and talent toward the child care study, the committee would be happy to have you join them. There will be a sign-up sheet for volunteers at the open forum on July 17th or you can leave your name with Jill Buda on extension 4860.

Child Care Concerns Questionnaire

Working Parents
If you are a working parent, please respond to the questions in this section:

1. At this time, what provisions have you made for child care?
   Day Care Center _____ Pre-School _____ Family Day Care Home _____ Other _____

2. What age of child(ren) needs care while you work?
   below age 1 _____ age 1 _____ age 2 _____ age 3 _____ age 4 _____ age 5 _____ school age _____

3. During what hours do you need care for your child(ren)?
   _____

4. Has locating a sitter or child care arrangement been a problem for you?
   yes _____ no _____

5. In the last year, how many work days have you lost due to a problem with your child care arrangement?
   _____

6. In the last year, how many work days have you lost because your child(ren) had a minor illness and was, therefore, not permitted to attend his/her regular day care?
   _____

7. Do you consider your present day care arrangement:
   Excellent _____ Good _____ Adequate _____ In need of improvement _____?

8. To what degree are you concerned with your child care arrangement while you work?
   Never concerned _____ Occasionally concerned _____
   Frequently concerned _____ Constantly concerned _____

9. What are you presently paying a week per child for child care?
   $20-30 _____ $30-$50 _____ $50-$100 _____ $100-$150 _____

Concerned Allergan Employees and Parents
This section of questions is for employees who are concerned with day care but do not presently have children. Allergan parents please respond to this section as well.

1. Would you prefer a children's day care facility close to home? _____ close to work? _____

2. Would you value a child care facility close to work as an important benefit? yes_____ no_____

3. Would you value a child care facility with an infirmary to care for children with minor illnesses? yes_____ no_____

4. If an onsite or near work quality day care center existed, would you want to place your child(ren) in the program? yes_____ no_____
   or. . .
   Would you prefer to continue with your present day care arrangement? yes_____ no_____

5. If you presently do not have a need for child care, do you feel you may have a need in the future? yes_____ no_____

6. If you personally do not have a need for child care, would you be supportive of a child care program to serve Allergan employees? yes_____ no_____

7. What elements would be most important to you in choosing a day care program? _____
   _____
   _____
   _____

8. What would be your ideal child care arrangement? _____
   _____
   _____
   _____

An Allergan Welcome to: Susan Manrow, R.N., Health Services Clinic

Health Services Clinic

The Health Services Clinic is now open and functioning. An Open House is planned for late July, but feel free to stop by and meet **Sue Manrow,** Allergan's Occupational Health Nurse.

Sue comes to us from Orange Coast College where she worked for the Student Health Services. She received her B.S. in Nursing at Cal-State, Long Beach and is currently completing her masters in Nursing.

Sue will be providing direct medical care to employees for injuries or illnesses occuring while on the job. She will administer first aid, perform diagnosis and decide if the employee can return to work. She will also be conducting pre-employment physicals. Of additional interest to employees, Sue will be able to perform nursing diagnosis of non-occupational illnesses or emotional concerns.

The hours at the Clinic will be 7:30 am - 4:30 pm daily. The Clinic will be closed at lunchtime from 12 - 1. You will find the Clinic in the Teller Building near the lunchroom.

Employees who injure themselves on the job should continue contacting their supervisors first. Supervisors will then call Sue and send the employee to her for care.

Please drop in and meet her in the afternoons (mornings will be busy due to the pre-employment physicals) or call her for an appointment. The Clinic's number is extension 4230.

July holiday scan

July 4 — Declaration of Independence Anniversary.

July 15 — National Ice Cream Day.

July 20 — Moon Day

July 21 — Ernest Hemingway's Birthday. American novelist born July 21, 1899.

July 28 - August 12 — Games of the XXIII Olympiad. Los Angeles Memorial Coliseum, Los Angeles, California. Most prestigious of international athletic competitions. Patterned after the ancient Greek festivals, the modern series, which began in 1896, is held every four years (wars and international politics permitting). Last held at Moscow, U.S.S.R. (1980); next scheduled for Seoul, Korea (October, 1988).

Canada's hero

Maybe you remember last year when we told you about Michel Bernier, Canada's Warehouse and Traffic Supervisor who helped rescue a four year old girl from certain drowning in the icy waters of the Outaouais River.

Well, Mr. Bernier has been awarded the Medal of Bravery and will be receiving his award from the Governor General, the Right Honorable Edward Schreyer, in a ceremony in Ottawa in the near future.

Bernier, who is chief of Pincourt's volunteer fire department, said he was very pleased and honored, but he considers the rescue just part of his job, which he has held for 25 years.

We are all very proud of you, Michel.

Blood Drive Results

Allergan's 12th annual blood drive was held on May 23 and 24, 1984, in the Von Karman lunchroom. Overall, 180 employees participated in the drive donating a total of 144 units of blood.

Special thanks to all employees who participated in this community service program and especially to **Gaelyn Hanable** in Human Resources who organized one of the smoothest running campaigns in Allergan's history.

For those of you who were unable to participate or would like to donate again this year, a mobile unit will be at the Pullman facility on September 4, 1984.

Thanks for giving the gift of life.

Authors' Luncheon

The Sixth Annual Allergan Authors' Luncheon, hosted by **Dr. Peter Ridley** and presented by Medical and Scientific Information, was quite appropriately held this year on William Shakespeare's birthday, April 23. This event is held annually to honor those Allergan employees who have published scientific papers in the preceding year. **Dennis F. Marsh,** Senior Professional in Analytical Chemistry, received this year's $100.00 Publication of the Year Award for an article coauthored by **Lloyd T. Takahashi,** Research Section Manager in Analytical Development. The article, entitled "Determination of Benzalkonium Chloride in the Presence of Interfering Alkaloids and Polymeric Substrates by Reverse-Phase High-Performance Liquid Chromatography," was published in the Journal of Pharmaceutical Sciences.

Dennis, who has been with Allergan for five years, received his B.S. in Organic Chemistry from Wisconsin State University at Stevenspoint. His current interests include laboratory automation and database management. Lloyd, who has an M.S. in Analytical Chemistry from the University of Arizona at Tucson, is currently interested in new analytical instrumentation and techniques, and analytical methodology, and has been with Allergan over ten years.

Peter Ridley and Dennis Marsh

The Publication of the Year is selected each year by committee, and the selection process is based on four major criteria: the quality of the research, the quality of the manuscript itself, the contribution of the manuscript to the scientific community, and the impact or potential impact the manuscript will have on Allergan. Other Allergan authors published in 1983 included **J. Anderson, N. Athanikar, D. Berberian, C. Chen, J. Conway, G. DeVries, S. Dromgoole, E. Duzman, S. Eriksen, F. Kleist, S. Ledgard, I. Leopold, J. Lue, R. Meyer, G. Novack, D.S. Robins, J. Sefton, D. Tang-Liu, R. Weinkam, L. Wheeler, M. Wolff, D. Woodward, M. Yang, and L. Zober.**

This year's speaker, Dr. Manfred Wolff, Vice President of Discovery Research, shared his experiences in scientific writing with a presentation of "The Who, What, Why, When, and Where of Scientific Publications."

Creative solutions

The very successful work-at-home program, created by **Gordon Schooley** of Information Systems and Services (ISS) to solve a severe shortage of office space, has been the solution to yet another problem.

Christina Salvatierra, a Data Control Clerk in ISS, faced a three month convalescence after undergoing the second surgery on both of her knees, and Christina's supervisor, **Carol Reilly,** wondered how the department would manage without her.

Necessity, once again, led to a creative solution. Working with Human Resources and within guidelines set by Christina's doctor, Carol and Gordon were able to set up a work schedule and home terminal for Christina.

Christina, recovering now from her surgery, works safely and comfortably in her own home and provides valuable assistance to her busy department. She surely is the envy of her colleagues for having the opportunity to work with her feet up!

BECU moves to provide better service

The Allergan branch of the Beckman Employees Credit Union will be moving to the first floor of the Tower in order to provide better service to Allergan employees. The new office, just across from the first floor conference room, will be larger than the present site and more conveniently located for serving the majority of employees.

The move is expected to take place the first week of July. Watch the bulletin board for the announcement of the exact date. An open house to celebrate the new location will be announced shortly after the new office is opened.

Allergan Company Picnic

Allergan cordially invites you and your family to the 1984 Company Picnic

SHADE TREES

COVERED SEATING

Sunday, July 15, 1984
10:00 am to 5:00 pm

GAMES & CONTESTS

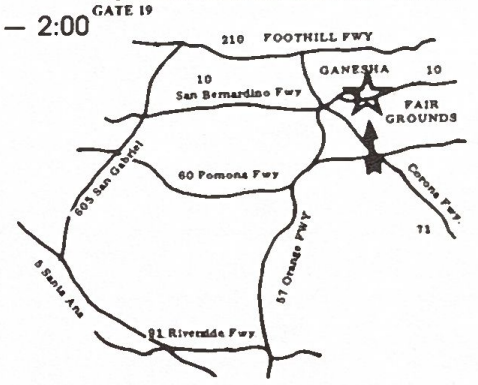
BIG PRIZES

Picnic Hill, L.A. County Fairgrounds

Highlights of this special day include	**Event Time**
• Frisbee, volleyball and horseshoes	10:00 am — 5:00 pm
• Kiddieland opens (Moonbounce, Mechanical swing)	11:00
• Adult picnic contest	11:00
• Bingo — 10 games with prizes	11:30
• The Bighorn BBQ Lunch (unlimited) — BBQ Chicken and BBQ Beef, Country Bread Basket, Western Chili Beans, 3 delicious salads, iced fresh fruit and cookies. Ice Cream, popcorn and beverages available all day.	noon — 2:00
• Dunk Tank	12:30
• Baby Candy Scramble (2 to 4 years old)	1:15
• The Great Races for the entire family	1:30
• Beer drinking contest	3:00
• Adult picnic contest	3:30
• Award time for contest winners	4:00
• The end to a great day	5:00

L.A. COUNTY FAIRGROUNDS

VIA San Bernardino Freeway — EXIT GANESHA. Go left on GANESHA to McKINLEY and turn right — Fair on left — GATE 19



Every employee in attendance will receive a tote bag and "frisbee"

All this for only: **$2.50 Adults (12 years and above)**
$1.00 Children (2 to 11 years)
Children under 2 Free

FREE GIFTS

BINGO

UNLIMITED FOOD SERVICE

The party is limited to Allergan employees, spouse, one guest if single, children **OR** grandchildren. All guests must be accompanied by an Allergan employee.
